Nozzle Switch Setting:

The Wonderbox should not be operating an off-hook switch or nozzle switch that requires voltage higher than 12VDC from the board inside the unit. If you believe one may have been installed in error, please contact our Technical Support team at (281) 446-7300 or the installer to determine if your nozzle switch is safe to use with the Wonderbox. If you are not sure, please power down the Wonderbox until you are able to determine if your Wonderbox is wired properly. Failure to do so could result in irreparable damage to the board on the Wonderbox.

- Press the down arrow to "Nozzle Switch" and press enter
- Press the right arrow to "Yes or No" and press enter.

Once all queries have been set, continue to hit the "Exit" button on the Wonderbox Keypad to exit all menus.
