## **MOVING HD MANAGER 8 FROM ONE COMPUTER TO ANOTHER**

1. On the computer that has the information you want to transfer, plug in your USB Stick
2. In HD Manager, Navigate to: Settings -> Database -> Backup tab
3. Click Save Backup as
4. Save the backup.fbk file to the USB stick
5. Double check the file has been saved to your USB stick
6. Go to the computer you want the information to be transferred onto
7. Use the following link to download the HD Manager 8 installer to your new computer: <http://horn-teca.de/hda8/>
8. Plug in the USB stick
9. Install and open HD Manager on the new computer
10. Navigate to: Settings -> Database -> Backup tab
11. In the box under "Database with designation" type a name for the backup file
12. The Restore button should light up. Click Restore
13. Go into the USB drive and select the backup.fbk file
14. HD Manager will automatically restore data from backup
15. Under Settings > Database > Summary, HD Manager will show a Statistics list of all information imported from backup
16. Go to Master data tab and verify drivers/vehicles/transactions are present
